SKILLS

- React | JavaScript | Next.js | Java | jQuery | RTK Query |Redux |PostgresSQL | Bootstrap
- React Native| Express | MySQL | MongoDB | Node | MERN Stack | Material UI | Typescript
- Frontend | Backend | Full-Stack | AJAX Git | AGILE Methods

EXPERIENCE

Software Developer - KES Consulting   0CT 2021 - CURRENT

- Developed custom-built applications for diverse clients, enabling them to test and refine user interface and functionality.
- Worked closely with clients to gather requirements and address feedback throughout the development process.
- Collaborated with a cross-functional team to ensure timely delivery of high-quality software applications.
- Utilized Agile methodologies to manage project timeline and prioritize features based on importance and impact to client's business goals.
- Developed over a dozen mobile-responsive user interfaces according to Figma design specifications to ensure clients desired user experience.

Full-Stack React Developer Intern - Quictivity   FEB 2021 - AUG 2021

- Redesigned and developed the UI and UX of the exercise management platform to exponentially increase its data entry efficiency.
- Introduced Redux for state-management and data mutation to allow for real-time changes being tracked on the API.
- Reduced data entry errors by implementing dynamic form validation.
- Developed over a dozen custom designed components for a shared component library.
- Tracked workflow and sprint progress using Jira. Followed traditional Scrum principles by actively participating in daily stand-ups, sprint plannings, retrospectives, and creation of user stories.

PROJECTS

Facebook Clone - July 2021
https://fb-clone-27bf9.web.app/ |Source Code
This Facebook clone was created to practice developing responsive UX/UI using React.js and Material UI. Using a gmail account, users are able to login to the site with an integrated google authentication. With firebase's database, users are able to create or view real time posts from other users on the site. This app also includes a facebook embed linked to an actual github facebook account to view real posts from github.
Technologies Used: React | Firebase realtime DB | Material UI| Firebase Google Authentication

EDUCATION

UNIVERSITY OF NORTH CAROLINA, Charlotte, NC – Full-Stack Web Development Bootcamp
